Looking at different solutions for non-emergency call loads. Currently takes 80k calls a year and around 15k are actually emergency calls. Possibly able to use AI technology to help filter those calls. Interested in feedback in calling their center for a non-emergency issue and getting an AI bot. Auto dispatch is a big deal; this new agreement will streamline the process. Air ambulance will make the call to get a different transport if they cannot take the call.

Fire Marshall retired and now Steven Beamer has taken that position. 3 in training academy right now; if all pass will only have 1 open position. Might see more air ambulance response in the county.
